Subject: Gulfco Marine Maintenance Site - Phone call from Noble Energy (on behalf of Samedan Corporation), Houston, TX

I received a phone call earlier today from Terry Webster, Noble Energy, 100 Glenborough, Ste. 100, Houston, TX 77067 (281.874.6781). Mr. Webster is the Environmental Coordinator for the corporation, responding to EPA's Request for Information letter, directed to Samedan Oil Corporation, Ardmore, Oklahoma. Mr. Webster wanted to advise EPA that his company is conducting research into Samedan's business association, if any, with the corporate entities that operated the Gulfco Site. I directed Mr. Webster to the EPA website for reference documents, including the Superfund Site Status Summaries and the Site's Federal Register Notice, and advised him to contact us again if he needs additional time to respond to EPA's letter.
